

## Product description

**Description** Glucose is the most abundant naturally occurring monosaccharide. It is very rich in calories. Glucose is mainly manufactured from corn or from wheat and potatoes.

**Taste** Sweet

**Appearance** high transparency and viscosity

## Microbiological chemical analysis

**Total Plate Count (cfu/g.)** < 500

**Yeast and Mold (cfu/g.)** < 10

**E. coli** None

**Staphylococcus aureus** None

**Bacillus cereus** None

## Physical chemical analysis

**Sulphated Ash** Not more than 0.5%

**Arsenic** Not more than 1 ppm%

**Copper** Not more than 2.5 ppm%

**Lead** Not more than 0.5 ppm%

**Sulfer Dioxide** Not more than 25 ppm%

## Other specs

**Shelf life** 12 months

**Transport** Loose in bulk

**Storage** Store in room temperature ( $\leq 30^{\circ}\text{C}$ ), in dry environment, tightly packaged.
