

Product description

Description Glycine is a nonpolar amino acid, the simplest one of the 20 natural amino acids.

Apperance White crystalline powder

Physical chemical analysis

Molecular wieght 75.07

Melting point 245°C with decomposition

pK1 2.34

pK2 9.60

Isoelectric point 5.97

pH of 1.0 molar solution 6.06

Sulibility in 100 ml water 25g at 25°C
39.1g at 50°C
54.4g at 75°C
67.2g at 100°C

Solubility in 100g absolute ethanol 0.06g at 25°C

Other specs

Transport Loose in bulk

Shelf life 24 months

Storage Store below 37°C in a closed container
