

Product description

Appearance Irregular granules with dust

Chemical name Calcium Chloride

Grade Food Grade

Shelf life 4 years

Storage and Transport

Storage Stored and kept in its original package (tightly closed), in clean and dry warehouses away from humidity, direct action of any heating sources and from the incompatible substances.

Transport transport is made by covered means of transport. According RID/ADR last edition, the product is not included into any danger class.

Product Properties

Calcium chloride content
- expressed as calcium chloride Min. 77%
- expressed as CaCl 2. 2H2O Min. 102%

Alkalinity expressed as calcium Hydroxide Max. 0.3%

Alkaline and magnesium salts content Max. 4%

Acid insoluble substances content Max. 0.02%

Acid insoluble particle size (corresponding to 1 kg of sample) Max. 2mm

Sulfates (SO4) content Max. 0.05%

Iron content (Fe) Max. 10mg/kg

Arsenic content (As) Max. 3mg/kg

Mercury content (Hg) Max. 1mg/kg

Lead content (Pb) Max. 2mg/kg

Fluoride content (F-) Max. 0.004%
