

Product description

Soy Protein Concentrate is manufactured from healthy, genetically non-modified soybeans, which are crushed, dehulled, flaked and extracted. After extraction soybean meal is processed by a special enzymatic - fermentation process where all antinutritional factors are inactivated, protein level is increased as well as the utilization of proteins which leads to higher growth performance.

Appearance

White fine powder

Odour / Taste

Typical, without discrepancies

Storage

In original and un-opened packaging at temperatures below 24°C and a relative humidity of max. 60%

Packaging

The product is available in Small Bags or Big Bags.

Chemical and Microbiology values

Protein on dry matter	Min. 52,5%
Moisture	5-8%
Ash	6,5-8%
Fat	<=1%
Salmonella	Negative in 25 g
E. Coli	<10
Standard plate count	<=10000
