

**RAPESEED LECITHIN LIQUID**

| <b>Chemical-Physical Parameters</b> | <b>Analysis result</b>         |
|-------------------------------------|--------------------------------|
| Appearance                          | Brown liquid                   |
| Taste / odour                       | Typical, no extraneous flavour |
| Acetone Insoluble                   | 60 % minimum                   |
| Moisture                            | 1,0 % maximum                  |
| Acid Value                          | 35 mg KOH / g maximum          |
| Peroxide Value                      | 5.0 meq / kg maximum           |
| Hexane / Toluene Insoluble          | 0.3 % maximum                  |
| Viscosity at 25°C                   | max. 12.5 Pa.s                 |
| Color Gardner                       | max. 15                        |
| <b>Microbiological Parameters</b>   |                                |
| Total Plate Count                   | Max 3000/g                     |
| Yeast                               | Max 50/g                       |
| Moulds                              | Max 50/g                       |
| Coliforms                           | negative in 1g                 |
| Salmonella                          | negative in 25g                |
| <b>Metals</b>                       |                                |
| Arsenic                             | Max 3 ppm                      |
| Lead                                | Max 2 ppm                      |
| Mercury                             | Max 1 ppm                      |
| Cadmium                             | Max 1 ppm                      |

**Storage conditions:** A dry place in unopened packaging.

**Storage temperature:** 4–25°C.

**Shelf life:** Min 18 months from the date of manufacture.

**Packaging:** Drums, IBCs, flexitanks.
